

### BS-2080F(LED) Fluorescent Biological Microscope

#### Introduction

BS-2080F(LED) Series LED fluorescence microscopes is a newly developed microscope, the microscope uses LED as the fluorescent light source, the life span of the LED lamp is much longer than mercury lamp, the performance is also better.

#### Feature

- 1. Excellent fluorescent image with infinite optical system.
- 2. LED illumination with 50,000 hours life span.
- 3. No need for cooling system and protection device due to LED cold light source.
- 4. 465-476nm excited wavelength with high SNR.
- 5. Convenient to use, no need warm-up.
- 6. More fluorescent filters are available for different applications.

#### Application

BS-2080F(LED) LED Fluorescence microscope is used to study the absorbing, transportation, chemicals distribution and positioning in cells. It is widely used in disease examination, immune diagnosis and life science areas.
